Consultative approach

We take a consultative approach, preparing a bespoke service to suit each client. DMC RR aim to deliver a reduction in your radiology department running costs, subject to visibility/access to existing running costs.

Peace of mind

Our service can offer Radiology Managers peace of mind by aiming to bridge the gap between excess demand and your department's capacity. Reporting backlogs can be a significant source of distress - DMC alleviate this in a timely, efficient manner, with quality reporting in a coherent house style a staple of our service.

Admin on us

Support and seamless connectivity are integral to our offering. We provide the hardware, software and maintenance required as a matter of course at no extra cost to you.
